## SKILLS

---

**BACK END DEVELOPMENT** | Node.js, Python, Go, PHP, TypeScript

**FRONT END DEVELOPMENT** | React.js, Next.js, Vue.js, JavaScript, Tailwind, Bootstrap, HTML, SCSS / CSS

**DATABASES** | MySQL, MongoDB, PostgreSQL, Redis

**MISCELLANEOUS** | Amazon AWS, Machine Learning, Git, Figma

## WORK EXPERIENCE

---

**KNOT HOST** | Node.js, TypeScript, React.js, Next.js, Go, Python, Machine Learning

**Apr 2023 - Present**

Lead Software Engineer

Dubai, UAE

- **Knot Mail** - SaaS-based AI driven email solution
  - Developed mailer services using Python to efficiently filter incoming and outgoing emails, enhancing email security and user connection reliability.
  - Developed an application using Go and React.js, empowering customers to seamlessly customize email solutions to suit their specific needs.
  - Fine-tuned an LLM to accurately categorize incoming emails, enhancing classification performance through advanced contextual understanding.
  - Successfully trained a regression model using scikit-learn to predict the likelihood of emails being spam or legitimate, resulting in a significant boost in email filtering accuracy.
- **EC Manager** - SaaS-based ecommerce management platform
  - Implemented a secure authentication service using Node.js and Redis, ensuring customers can log in safely and efficiently.
  - Developed and integrated multiple payment gateways, including Stripe and PayTabs, enabling customers to freely select their preferred payment methods.
  - Led the team in designing and developing an e-commerce application within the management platform for six customers using Next.js and Node.js, ensuring successful delivery and implementation.
- **SiteWatch** - Web service monitoring solution
  - Developed a web service monitoring solution using Node.js and BullMQ to ensure continuous uptime and promptly address any service disruptions.
  - Enhanced customer trust in services through the implementation of the monitoring solution, resulting in increased revenue for the company.
- Led the development team to successfully deliver the projects on time and within budget, ensuring all milestones and objectives were met effectively.
- Contributed to code quality enhancement by reviewing committed code, pinpointing and resolving bugs.

**PERFAGENTS PRIVATE LIMITED** | Node.js, Vue.js, AWS, TypeScript, MongoDB, Figma

**May 2022 - Feb 2023**

Software Engineer - Product Engineering

Ernakulam, India

- **Uncloud** - SaaS-based synthetic monitoring solution
  - Developed a secure API access key feature using Node.js that enables users to connect to the monitoring application and perform various actions seamlessly.

- Developed a notification alert system using Node.js and integrated various tools, including PagerDuty, Slack, and email to alert users based on monitoring thresholds.
- Led the frontend team in developing the user-interface using Vue.js for configuring monitoring, setting notification alerts and analyzing statistical metrics of monitoring results.
- Contributed to code quality enhancement by reviewing committed code, pinpointing and resolving bugs.
- Enhanced API development efficiency by deploying and documenting APIs in Swagger UI, streamlining the testing and integration process.

**Freelance (Self Employed) |** PHP, jQuery, Javascript, Bootstrap, MySQL

**Aug 2019 - May 2022**

Full Stack Developer

Dubai, UAE

- Completed over 40 web development projects, aligning with client needs and budget while ensuring customer satisfaction and desired results.

## EDUCATION

---

**B.Tech - Computer Science & Engineering,** A.P.J Abdul Kalam Technological University

India, **2018 - 2022**
